Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 3, 2007 has been entered.

Terminal Disclaimer

2. The terminal disclaimer filed on June 19, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,306,159 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Colvin et al. (6,066,160). Colvin et al. disclose, at least in figures 1-5, a device including a first anchor (30) having a locking mechanism (e.g., 20 or 92) configured to grip and hold a suture at any point along the suture and a cannula (e.g., 12 or 72), a second anchor (40) having a hole, and a suture (16), where the suture connects and first and second anchors by passing through the cannula of the first anchor (at 14A) while traveling in a first direction, by passing through the second anchor hole, and by returning through the cannula of the first anchor (at 14B) while traveling in a second and opposite direction, and where the first anchor is shaped (a circular, disc-shape) to seat below a first surface of a meniscus. Note: The introductory statement of intended use ("for repairing a defect in soft tissue" or a meniscus) has been carefully considered but deemed not to impose any structural limitations on the claims patentably distinguishable over the device of Colvin et al., which is capable of being used as claimed if one desires to do so.

Response to Amendment

5. The terminal disclaimer of June 19, 2007 overcomes the double patenting rejection in the Office action of April 19, 2007. With respect to arguments regarding the rejection based on the Colvin reference: As shown above, Colvin indeed discloses a first anchor (30) having a locking mechanism and a cannula (12 or 72), where element 12 or 72 is a small, tubular device with dual lumens.
